Art Unit: 3634

1. Claims 20 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims attempt to depend upon a cancelled claim.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4,7-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Buchanan. Buchanan discloses a window barrier comprising a frame 8 which includes upper and lower members, a barrier element 9, a securing member 11 operably coupled with door trim 5,6,7 and positioned in spaced relation to the window channel.

The applicants state that Buchanan fails to provide any structure positioned intermediate the door frame and the door for preventing movement of the window barrier by such positioning. This is not convincing for the frame 8 of Buchanan has an upper member (see figures 1 and 2) with securing members 11 disposed thereon which has the explicit purpose of maintaining the frame in a predetermined position within the window opening 3 which is intermediate the door frame and the door.

Art Unit: 3634

3. Claims 12-17,28,30,31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Moss et al. Moss et al disclose a window barrier comprising upper and lower frame members 14, barrier elements 16, first and second securing members 18,22.

The applicants argue that Moss et al. fails to disclose a lower frame member including a panel rest portion, a retaining flange, and a connecting portion connecting, and positioned intermediate, the panel rest portion of the retaining flange, in combination with at least one barrier element supported by the connecting portion and the lower frame member, such that the barrier element is laterally positioned intermediate the panel rest portion and the retaining flange. This is not convincing for the vertical flanges of the single channel 26 depending downwardly from the horizontal flange of the double channel 23,24 responds to the claimed panel rest portion, retaining flange, and connecting portion positioned intermediate therebetween.

The applicants further argue that Moss et al. provides no disclosure of an upper clip coupled to a barrier frame and including an outwardly extending first arm, a downwardly extending second arm, and a connector connecting the first arm and the second arm, wherein the first arm extends in a substantially horizontal plane, and the second arm extends substantially perpendicular to the first arm. This is not convincing for the horizontal flange from which the upright fin 21 extends fully responds to the claimed first arm.

Art Unit: 3634

4. Claims 5,6 are objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the

base claim and any intervening claims.

5. Claims 18,22-27 are allowed.

6. Any inquiry concerning this communication or earlier communications from the

Examiner should be directed to David M. Purol whose telephone number is (571) 272-

6833.

If attempts to reach the examiner by telephone are unsuccessful, the Examiner's

supervisor, Brian Glessner, can be reached at (571) 272-6843. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
